

EMIRATES FUTURE INT'L ACADEMY, ABU DHABI
CIRCULAR FOR WELL BABY CHECK-UP (KG 1 and KG 2)
(2023-24)

EFIA/CIR-42/2023-24

Date:24.11.23

Dear Parents,

This is to inform you that Ambulatory Health Services (AHS) initiated the well-baby check-up for Kg 1 and Kg 2 which is covered by Department of health

Introduction

Screening children at a young age helps detect growth and developmental failures against well-known milestones. Children up to the age of four are seen at different clinics as per DOH Standard Well Child visits (0-6 years) (HAAD/WCVS/SD/0.9 Version). Once the children join schools, the parents may not follow their children health as required by DOH guidelines which entail early childhood well visits, defined as occurring from 1-4 years of age and Middle childhood visits, defined as occurring from 5-6 years of age.

Objectives

Identify students who have or at risk of developing physical or mental health problems such as autism, ADHD and other mental issues

- Confirm and update the medical history profile of students after screening
- Alert parents/guardians to address their children's health risks
- Refer children to the specialized professionals for follow up providing preference to the nearest AHS health centers
- Support school nurses in identifying the individualized quality health care plan to students

The well child visits for ages 3 ,4 and 5(kg 1 and kg2) shall cover:

- Head to toe physical examination and review of medical history
- Calculation of Body mass index
- Visual Acuity test
- Hearing test
- Complete blood count/Anemia screening

Payment

Free of charge for Thiqa and Non-Thiqa

For further details kindly check the Google class room.
