CIRCULAR No. 60

COMMUNITY SUSTAINABLE SURVEY

Dear Parents and Students,
Greetings!

As part of the Subject Enrichment Project for the academic year 2025–26, we are pleased to inform you that two students of Grade 9-D, Master. **Rachit Bhatnagar** and Master. **Rishee Bodake**, have developed an innovative community-based website designed to assess the *Sustainability Score* of households in Al Dhannah. This initiative is aimed particularly at the AIS community **from KG to Grade 12** and integrates Artificial Intelligence with the UAE's national sustainability goals.

This project seeks to promote environmental awareness and foster a strong sense of responsibility within our school community towards environmental conservation and sustainable living. The survey collects meaningful data on various parameters, including:

- Household size
- Individual and collective modes of transportation
- Water and electricity consumption patterns
- Recycling and waste management practices

The collected information will be analyzed using AI tools to generate a detailed Sustainability Score for each participant. The results will be presented through clear graphical representations and comparative insights, enabling families to understand their environmental impact. Participants will also receive personalized feedback and practical recommendations to help them adopt more eco-friendly habits and reduce their carbon footprint.

This initiative aligns closely with the UAE Sustainability Vision 2030 and reinforces the nation's commitment to leveraging innovative technologies for a greener future. By combining AI-driven analysis with environmental education, the project not only supports national sustainability efforts but also enhances students' digital, analytical, and problem-solving skills.

Please note that this is a **pre-survey**, intended to help you understand your current sustainability score. A **post-survey** will be conducted after one month to measure improvements and progress towards achieving a 100% green score.

We request all parents and students to participate sincerely in this survey. Your involvement will contribute meaningfully to our collective efforts toward building a more sustainable community.

We congratulate Master. Rachit Bhatnagar and Master. Rishee Bodake of Class 9-D for their commendable initiative and contribution to the school community.

We request all our stake holders to complete the survey by 23rd January 2026

Thank you for your continued support and cooperation.

Best Regards

PRINCIPAL
