Introduction of Abacus and Brain Gym Program

Dear Parents,

Warm greetings from The New Indian School UAQ!

We are delighted to share with you that we are launching a new program in collaboration with Generation Next: **The Abacus and Brain Gym Program**, tailored for students from 1st to 5th standard.

This innovative program is meticulously designed to foster the overall brain development of our students. By engaging with the abacus beads, students will activate brain neurons, thereby enhancing crucial cognitive skills such as concentration, memory, and attention span. We firmly believe that this holistic approach will significantly contribute to your child's academic performance and personal growth.

Key highlights of the program include:

- **Structured curriculum focused on brain development**
- **Provision of study materials for all participants**
- **Certification upon completion of program levels**
- **Recognition and awards for outstanding performance**

The annual fee for this enriching program is AED 100, payable in two installments along with the school fees (AED 50 each in April and September). We assure you that this program is certified and will be conducted under the supervision of qualified professionals.

We urge you to seize this opportunity to enroll your child in the Abacus and Brain Gym Program, providing them with a solid foundation for success in academics and beyond.

Thank you for your ongoing support and partnership in nurturing our students' potential.

Warm regards,

Dr. Saifudheen P Hamsa

Principal
