

SCHOOL TRANSPORT

At AIS, we prioritize the safety and convenience of our students during their journey to and from the school. Parents, students, bus supervisors, drivers and school staff all play a vital role in maintaining safe school transport. We encourage all stakeholders to familiarize themselves with the transportation guidelines and procedures to ensure smooth and secure experience for everyone. The bus services are provided for inside Madinat Zayed (Al Dhafra Region)

AIS committed providing dedicated transportation for eligible students at the start and end of the school day. The service is managed by highly trained professionals committed to student safety. All school buses meet the highest safety standards, and drivers and bus supervisors are well trained and approved by the authorities to handle the children with care and responsibility.

To ensure the safety and monitoring of student transport, we have implemented Salama system, the digital application by integrated transport center, ensures real time tracking of buses, student attendance verification and timely communication with parents regarding their child's journey. Through Salama system, parents receive notifications when the child boards and departs the bus, ensuring safety and an added layer of security.

Students/parents are required to reach pickup/drop off point at least five minutes before arrival of the bus.

We remain committed to ensuring a safe and seamless transportation experience for all our students and parent community.

The documents are required to be submitted mandate by the parents along with payment of applicable bus fee.

1. Student Registration form for School Transport
2. Parent Undertaking Form for use of school transport as mandate by DOT.
3. Parent Undertaking for availing school bus facility
