Date : 3-7 Jan 2021

Objective

I will use count back 1, 2, or 3 as a strategy to subtract.

How can you count back to find
the difference for $9-1$?

$$2 + 4 = 6$$

Start at 9. count
back to find the
difference.

$$9 - 1 =$$

Strategy

Count Back

-1, -2, -3

Name _____

Count Back to take away small numbers, such as 1, 2, or 3.

$$5 - 3 = 2$$

Use the number line to Count Back.

Start at 9 and count back 2.

$$9 - 2 = \underline{\quad}$$

Start at 8 and count back 3.

$$8 - 3 = \underline{\quad}$$

Start at 13 and count back 2.

$$13 - 2 = \underline{\quad}$$

Let's try it!

I will do it!
