- ▶ **LO:**
- ▶ **I will identify the parts of a plant, functions of each part of a plant, and uses of some plants.**
- ▶ **SC: I will be successful once I can identify the parts of a plant, functions of each part of a plant, and uses of some plants.**

**Starter: Listen to the video and answer the questions.**

► <https://youtu.be/TD60-3rqPXg>

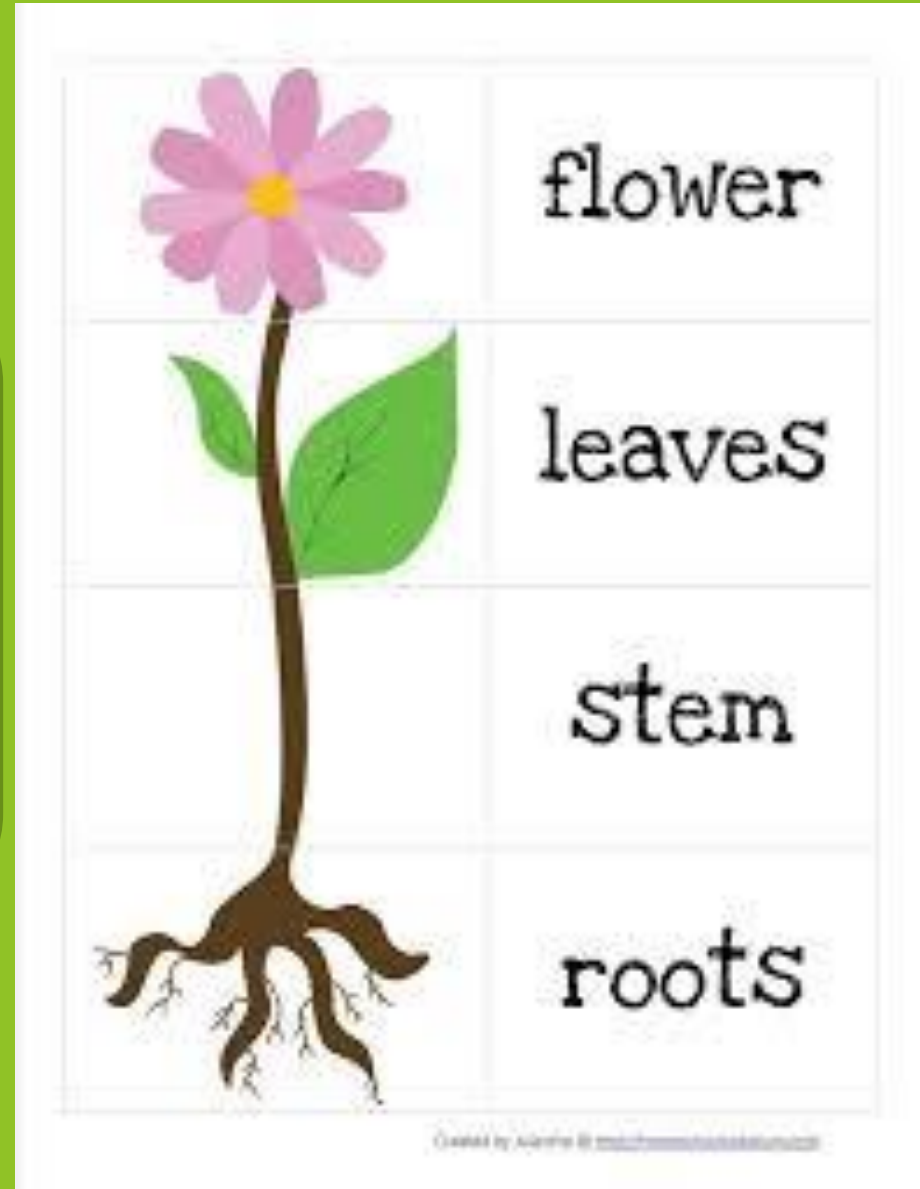

**Do you know the parts of plant? Which are they? Observe a real plant from your garden.**

**Make a video and send it your teacher through class dojo.**

What are the parts of a plant?

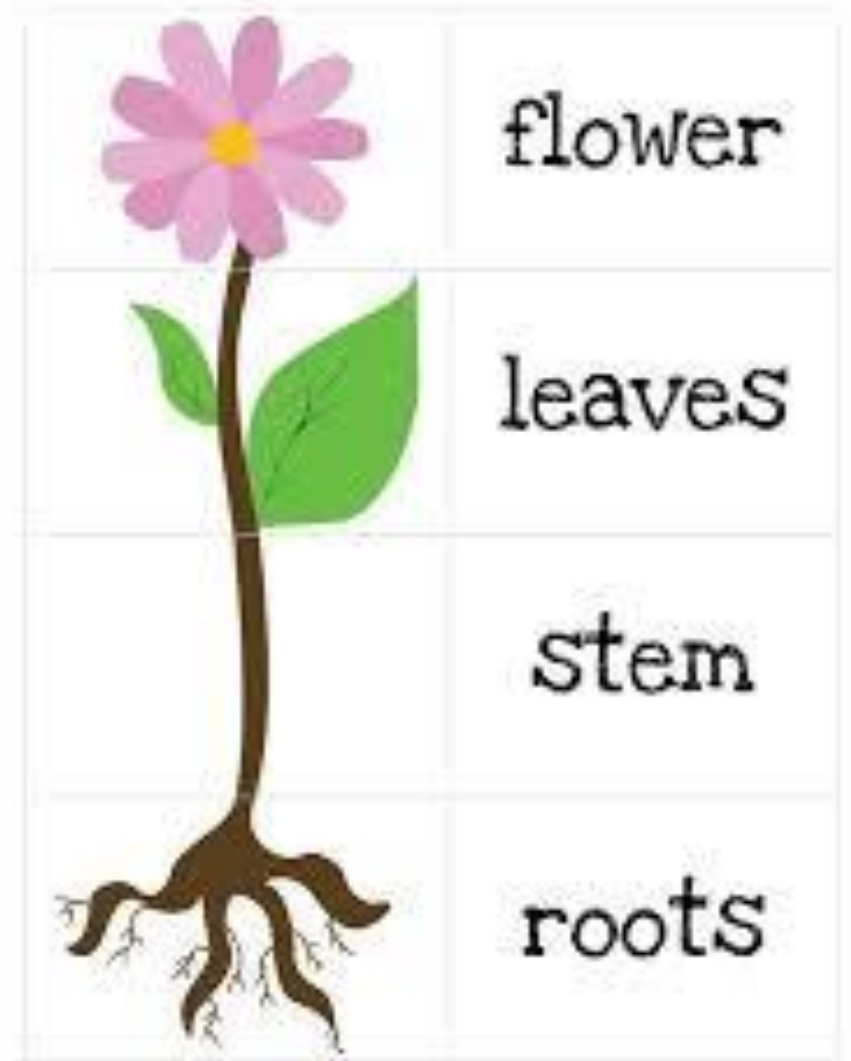

Flower  
Leaves  
Stem  
roots

What are the functions of mentioned parts of a plant?

Flower  
Leaves  
Stem  
roots

Created by [Adarsh B](#) on [Canva](#)

# Taking Root

A plant has roots that grow into the soil. The **roots** hold the plant in place. They take in water from the soil. They take in other things from the soil that the plant needs.

The **stem** holds up the plant. It takes water from the roots to the other parts of the plant.

A flower has a thin, soft stem. A tree has a thick, woody stem, called a trunk.

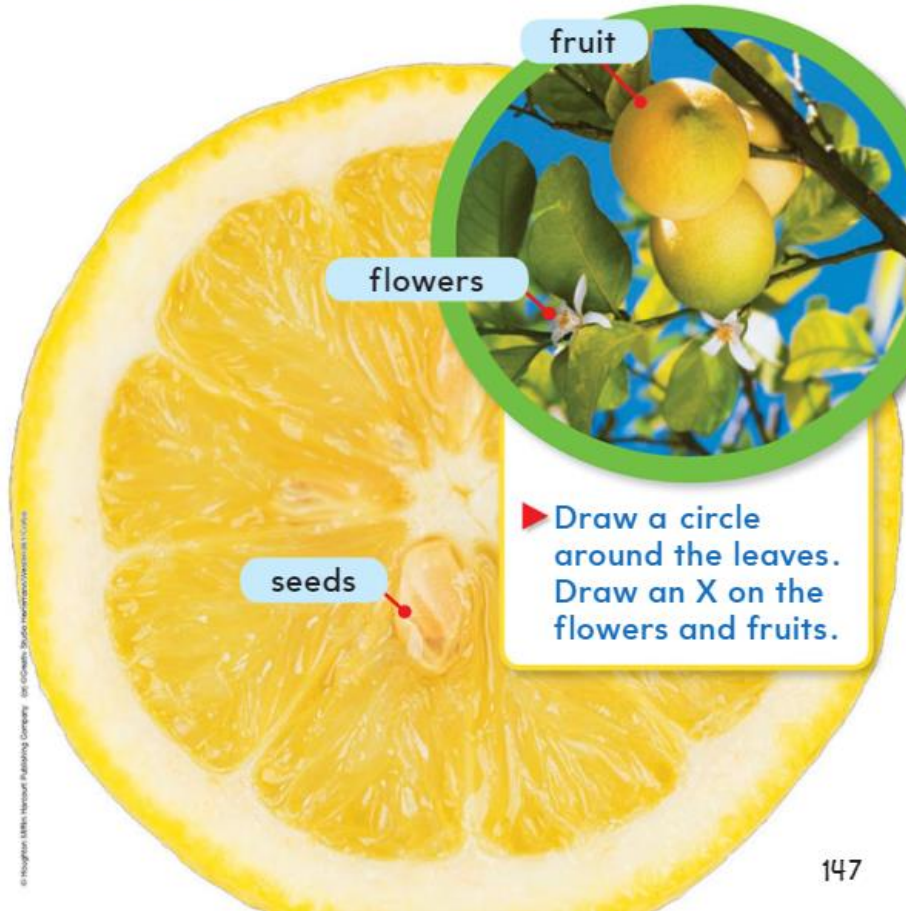

▶ Draw a triangle around the roots of the bean plant. Draw a circle

## Flowers, Seeds, and Fruit

Many plants have flowers. A **flower** is a plant part that makes seeds. A new plant may grow from a **seed**. The new plant will look like the plant that made the seed.

Many flowers grow into fruits. A **fruit** holds seeds.

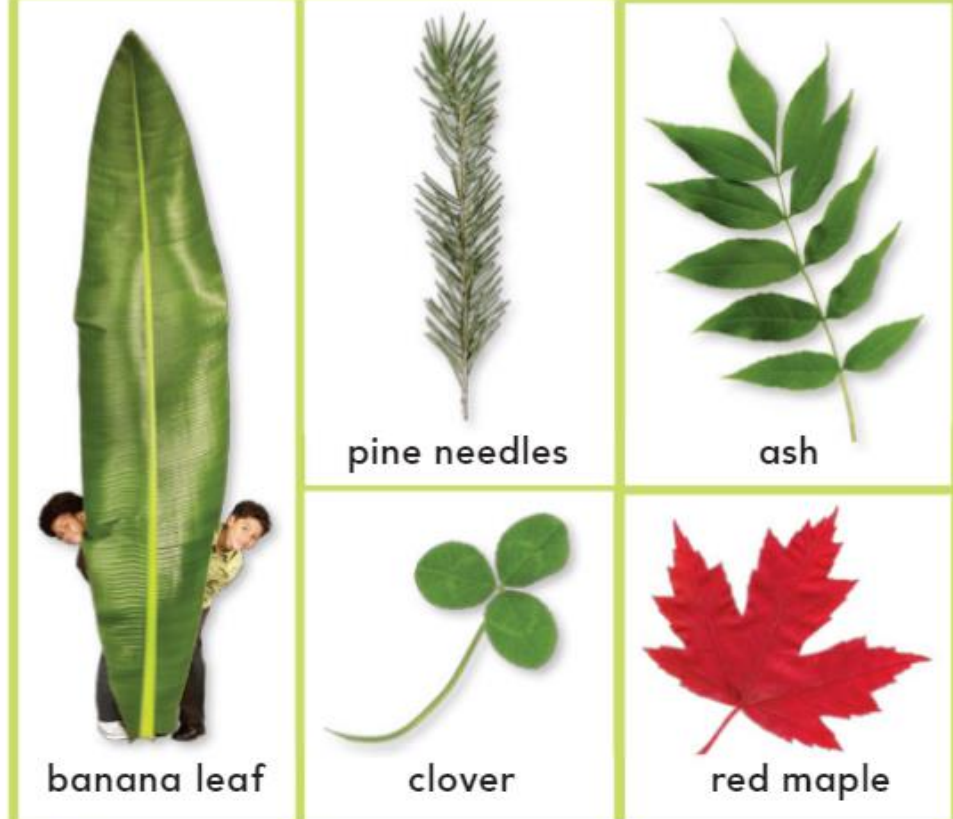

A **leaf** is a plant part that makes food for the plant. It uses light, air, and water.

### Active Reading

Find the sentence that tells the meaning of **leaf**.  
Draw a line under the sentence.

Leaves can be different shapes and sizes.

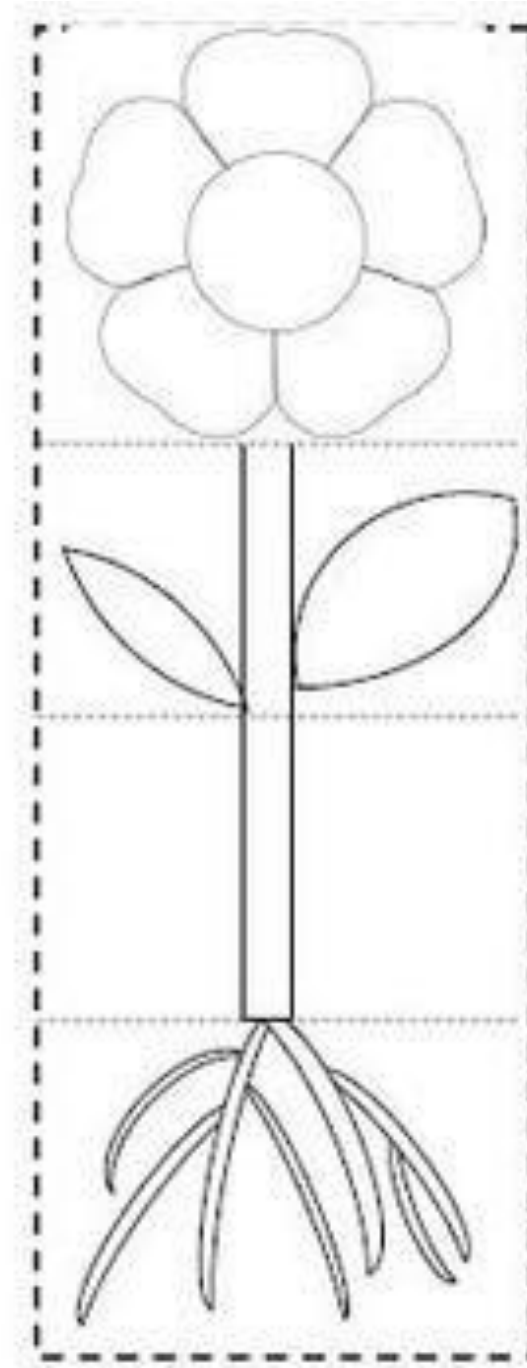

## Activity 1

1-Students will draw a model of a plant and will draw the parts of a plant.

2- write the functions of plant parts.

stem

roots

leaves

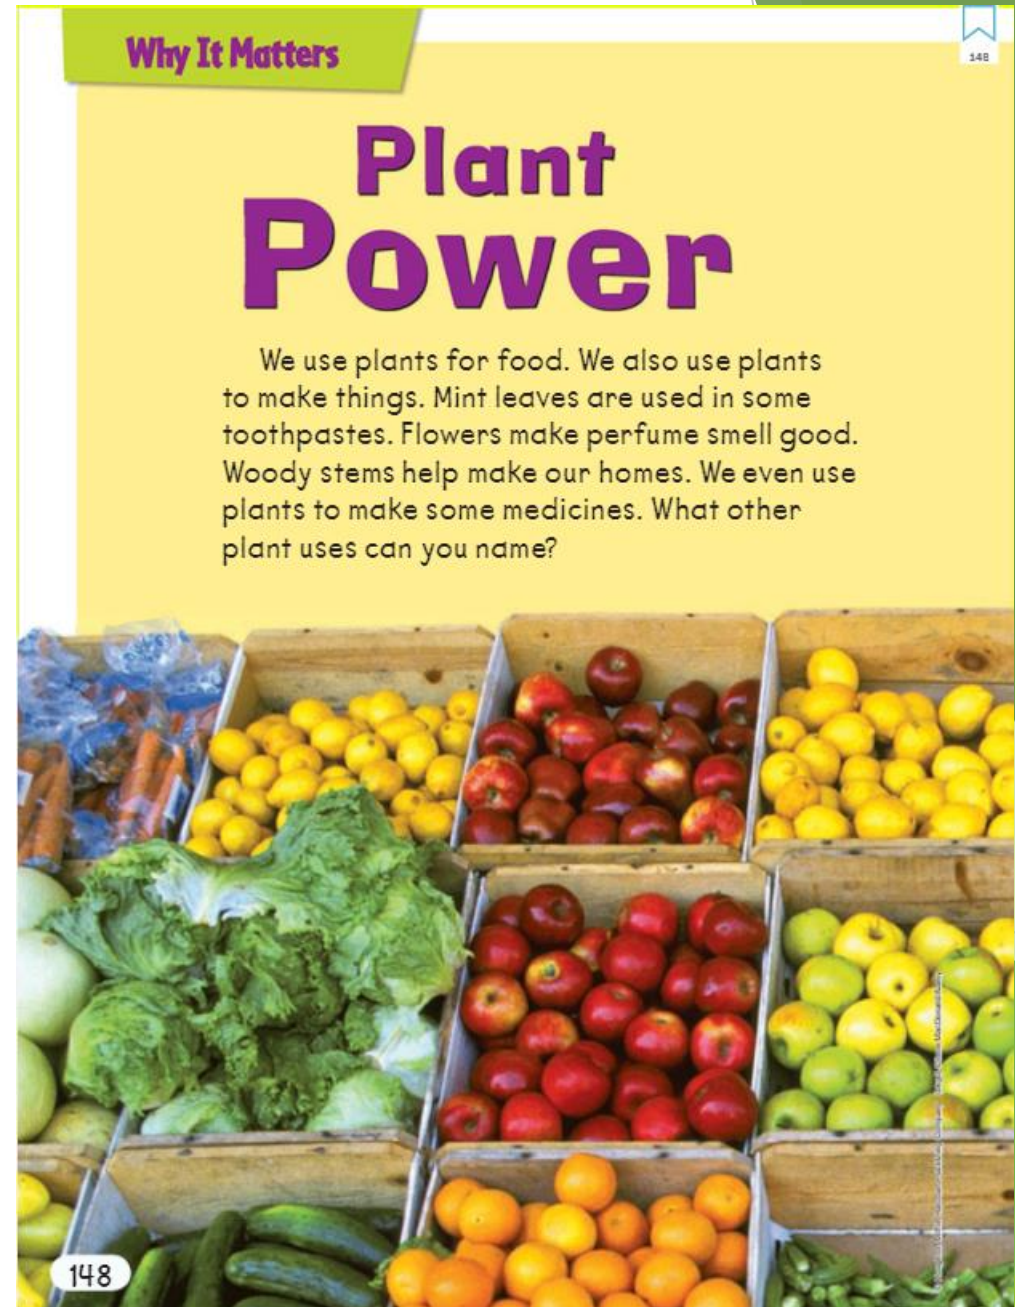

flower

**Activity 2**

**Students will collect two leaves and will write the uses.**

## Plenary

► **Complete the Science  
Fusion Book p. no.  
151.**
