

IIS/CIR/161/2025-2026

07/03/2026

Dear Parents,

“Greetings from IIS Family”

In line with the vision of the Ajman Executive Council and the Office of Private Education Affairs to enhance the digital quality of life in the Emirate, and out of our commitment to providing a safe and supportive electronic environment for our children, the Ajman TEC, in collaboration with the Office of Private Education, is launching an exploratory research study to better understand trends in social media use among children and adolescents in Ajman.

The study aims to explore the usage patterns of social media applications among students aged 12 to 18 years, (Grade VII to XII) and the challenges and opportunities they encounter in the digital world. It involves two surveys – one for adolescents and one for parents.

Recognizing the important role parents play as strategic partners in the educational process, we seek your constructive cooperation to ensure the success of this initiative.

We kindly request you to access the following link: (<https://ajyal.questionpro.com/ParentalConsent>) and complete the parental consent form. This will allow you to understand the scope of the survey and provide consent for your child’s participation. Once consent and an email address are provided, the TEC will send the survey links directly to you.

Please note that:

- Participation in this survey is entirely voluntary.
- All data collected will be treated with complete confidentiality.
- The information will be used solely for research and statistical purposes, aimed at developing policies and community programs in the best interest of students.
- No personal information identifying participants will be collected.

As a committed school, we encourage participation in this initiative and appreciate your support and partnership in ensuring a safe and positive digital environment for our children.

Your cooperation will be highly appreciated in this regard.

Stay safe and healthy!

PRINCIPAL
Ms. Qurat Ul Ain
