

LET'S EXPLORE THIS SUMMER 2020

HABITAT SUMMER ASSIGNMENT
FOR GRADES I–IV

HABITAT SCHOOLS

NOTE TO STUDENTS

Summer vacations are usually about going on trips and doing new things. Due to the Covid-19 situation, our movements are severely restricted. Let us think of this challenge as a possibility and explore the world within our own houses, shall we?

Do you know how many things we can do within our houses? There are many fun things we can do within our houses.

This year's Summer Assignment is about small little, lovely things you can do inside your house.

It is called "let's explore this summer"- explore means going to a new place to understand it better. Go inside your home, go to the kitchen, look out of the room, play with people at home and talk to people away on the net/phone- do all this and make your summer vacation one of learning and growth.

NOTE TO PARENTS

The tasks in this assignment are given in the coming pages. Please help your ward in doing these at home. Please make children write small notes on these activities and share it with the teachers through the LMS. Also remember to write/paint /voice record/video record some of the good memories from this summer assignment. It will be good to see them when everyone comes back to school.

Hope you have a good time doing this and learning something from everything around you in the house. Wish you a happy vacation!

Make sure the students are following all the health guidelines as per your residing country to prevent the spread of COVID19.

The Habitat Schools Team

**DO YOU KNOW
HOW MANY
THINGS WE
CAN DO WITHIN
OUR HOUSES?
THERE ARE
MANY FUN
THINGS WE
CAN DO WITHIN
OUR HOUSES.**

LET'S EXPLORE HOUSE, SURROU- NDINGS AND BOOKS

What are the noises you can hear and colours you can see from your room? Make a list and write descriptions of them in a notebook.

Keep watching the rain, sunshine and wind from your room and see what you can find about such natural events from this practice.

Practise arranging different corners of your home neatly.

Do you have plants in your house? If yes, understand their name and specialities. If no, plant a couple of them in pots or in the compound. Take good care of them.

Keep some water outside your house for birds every day - neither too hot nor cold. Identify the time when the birds come to drink water and replace fresh water regularly. Observe the birds and look up their specialities online and write notes. Do not keep water bowls on window ledges but only on balconies.

Read a minimum of 1 or 2 books. Sketch/photography different parts of your house or surroundings.

LET'S EXPLORE KITCHEN

What are the things required in the kitchen? Make a list based on your kitchen.

Make a list of the kinds of works involved in cooking.

Make a digital photo collection of different kinds of food made at home. Write small notes describing the item along with your experience of eating it.

Make a week-long healthy menu for the kitchen in consultation with your parents.

LET'S EXPLORE HEALTH

Make a chart of physical exercises/
yoga/drill/dance/work out for the
summer.

With the help of your parents find out
good indoor games that are best for
health and also fun.

Learn ways to give exercise to eyes and
practise them regularly.

Count the time you are spending for
physical activities every day.

Find out about the most healthy food
items and make a list.

LET'S EXPLORE FAMILY

Ask your parents about their favourite food, colour, place, childhood memory, teacher, school vacation and trip. Write about this in your diary.

Talk to your siblings and find out what they plan to do when they grow up.

Find a regular time to communicate with your grandparents, relatives and cousins through online mediums and find out from your cousins how their experience of the vacation was.

Find out about the native places of your mother and father through these conversations.

Make a family album with your parents, siblings and cousins from earlier times and write captions to these photos.

PARENTS MAY PLEASE REMEMBER TO KEEP VIDEOS, PHOTOS
AND NOTES OF STUDENTS IN THIS ACTIVITY SO THAT THEY
COULD BE LATER SHARED WITH THE TEACHERS AND SELECTED
ONES COULD BE SHARED WITH THE SCHOOLS WHEN THEY RETURN.
